A NEW DIRECTION FOR THE
MANAGEMENT OF INVESTMENT IN
SUPPLY CHAIN AND PRODUCTION
FACILITIES.....

New Directions.....

Focus on results

At THE POLYGON PARTNERSHIP we are focused on helping you to realise the benefits you are expecting from investments in your supply chain and production.

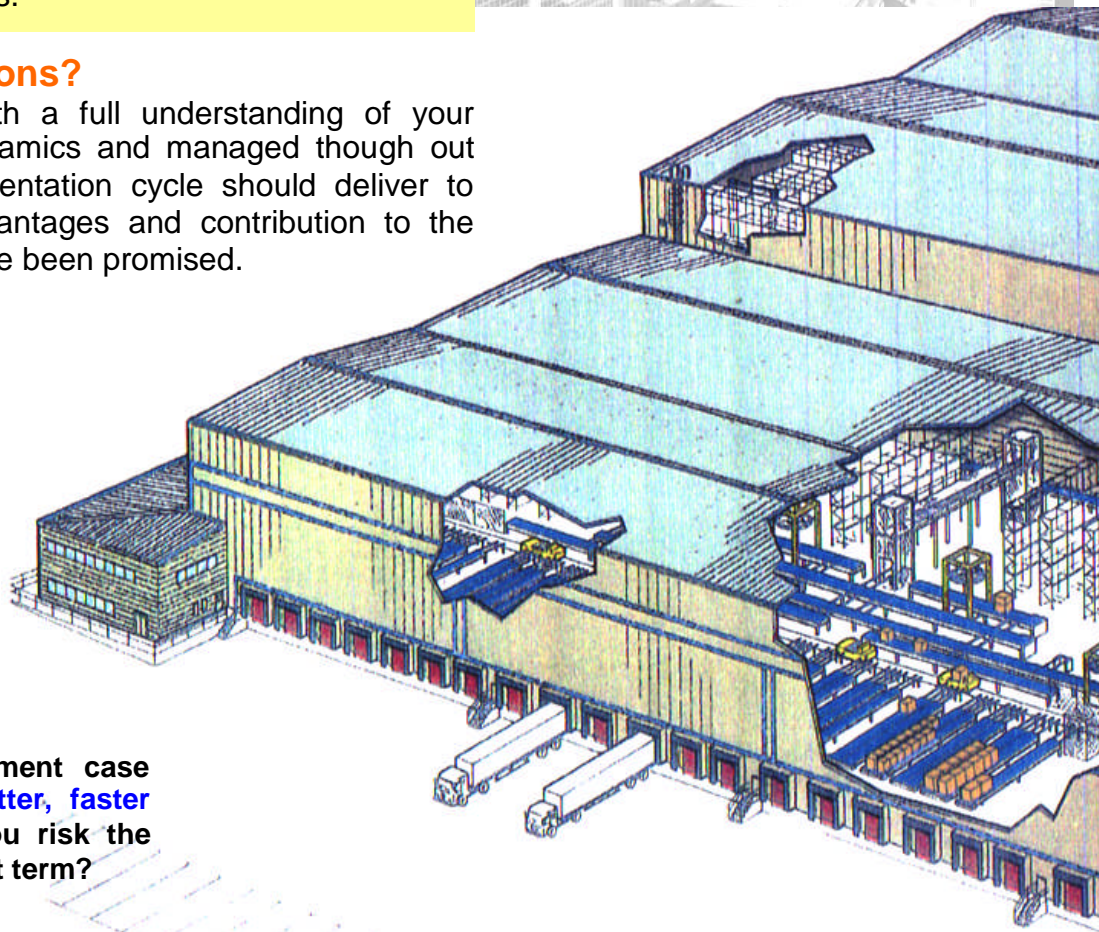

In the last 10 years there have been many new developments both in **physical** and **software systems**. Properly utilised these can help you manage your **production, inventory, order fulfilment** and **transport logistics**.

Implementing new systems can offer the prospect of greater flexibility, lower handling costs, faster stock turn and faster market response. You expect results and to realise your expectations.

Realising Expectations?

Systems conceived with a full understanding of your particular business dynamics and managed through the demanding implementation cycle should deliver to your business the advantages and contribution to the bottom line that you have been promised.

Why, when the investment case promises to deliver **better, faster and cheaper** should you risk the reverse even in the short term?

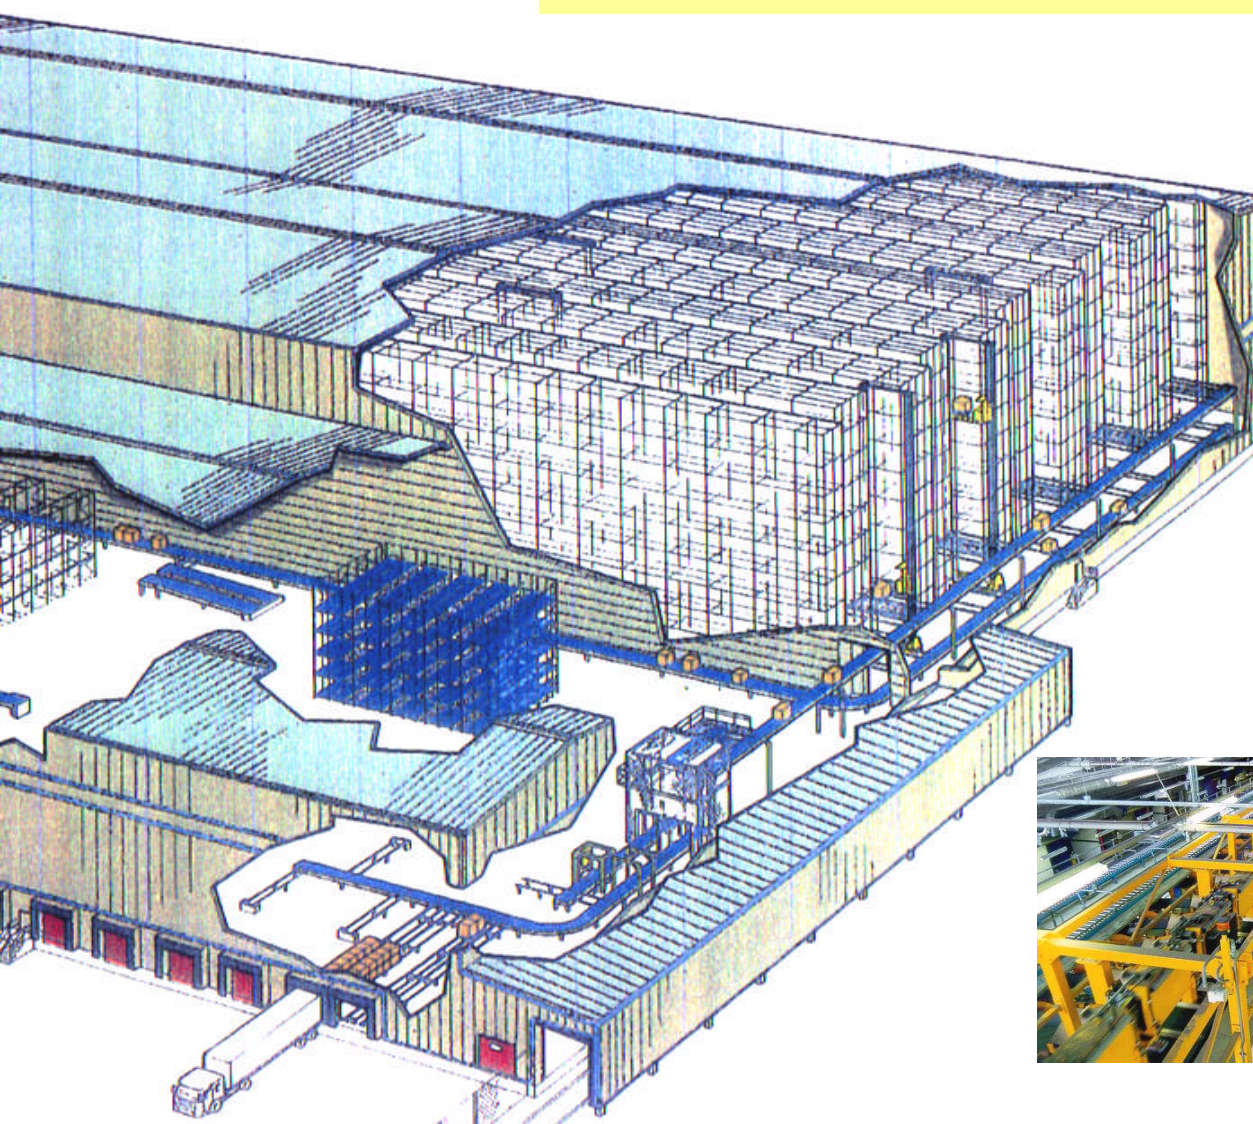

At POLYGON we believe that the usual project structure of suppliers and advisers can still leave the client vulnerable at critical stages of a project design, procurement and implementation. POLYGON provides the solution.....

..... Total Partnership

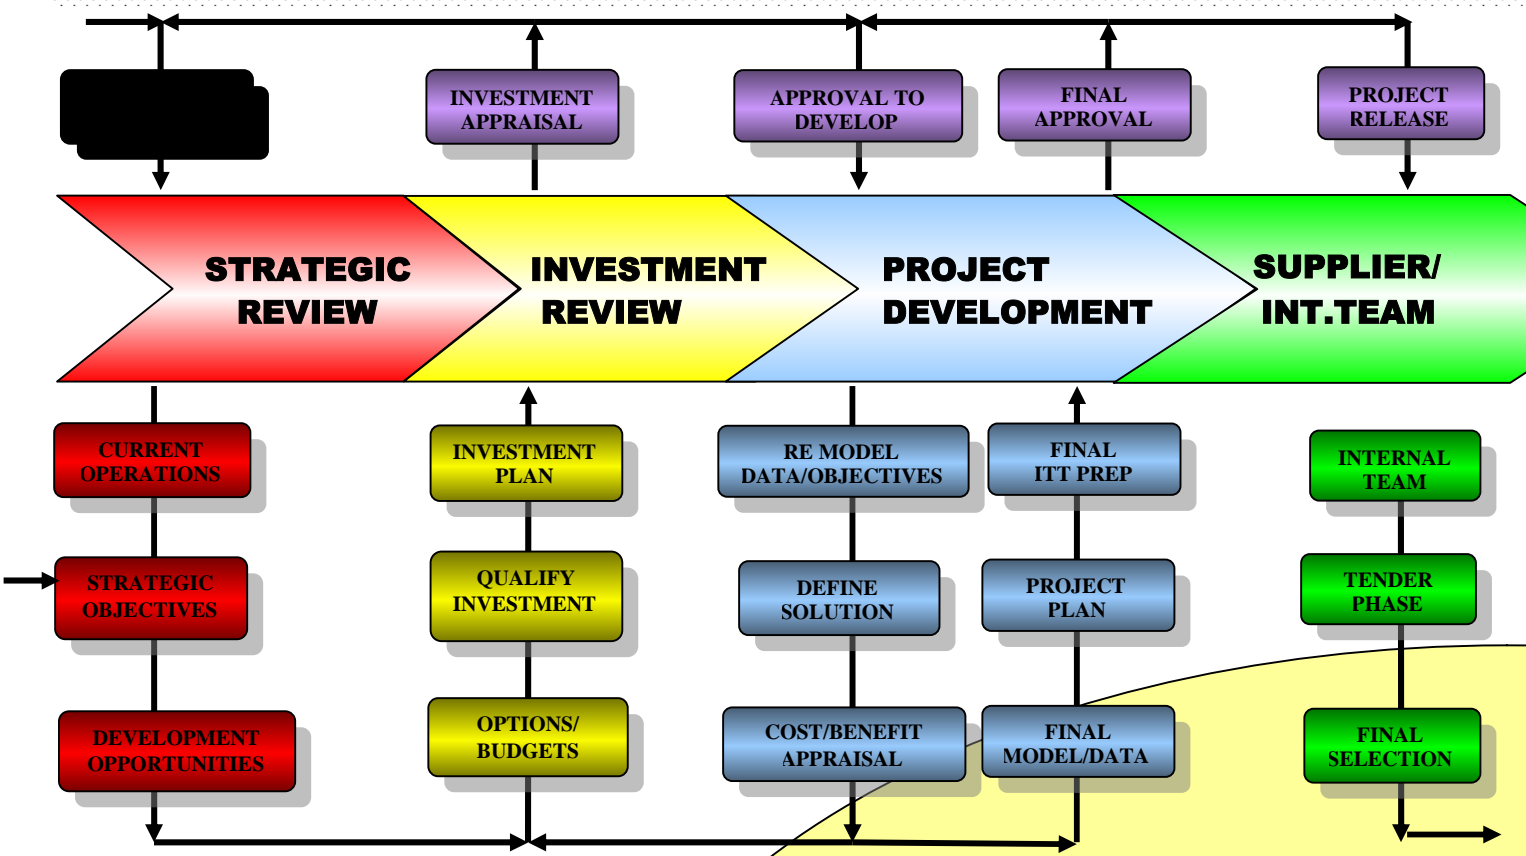

The POLYGON solution

Planning and implementing important operational systems in the supply chain or production are often cyclic events in companies who need to maintain focus on the dynamics of their business.

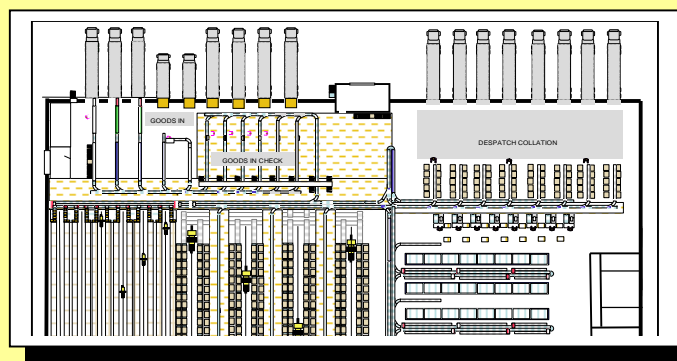

Selecting Polygon to develop these with you, enables you to better concentrate on business strategy knowing that there is an independent, experienced and knowledge based team working in partnership and focused on the design, performance and risk analysis of your project investment.

At POLYGON we tend not to use the term consultant, instead we prefer **Development Partner**. That's not to imply that we do not act in a consultancy role for our clients, but signifies an important distinction in the wider role that **THE POLYGON PARTNERSHIP** believes is vital for successful project development at each stage of evaluation.

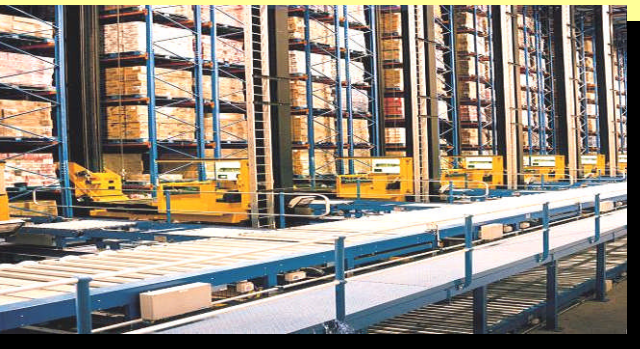

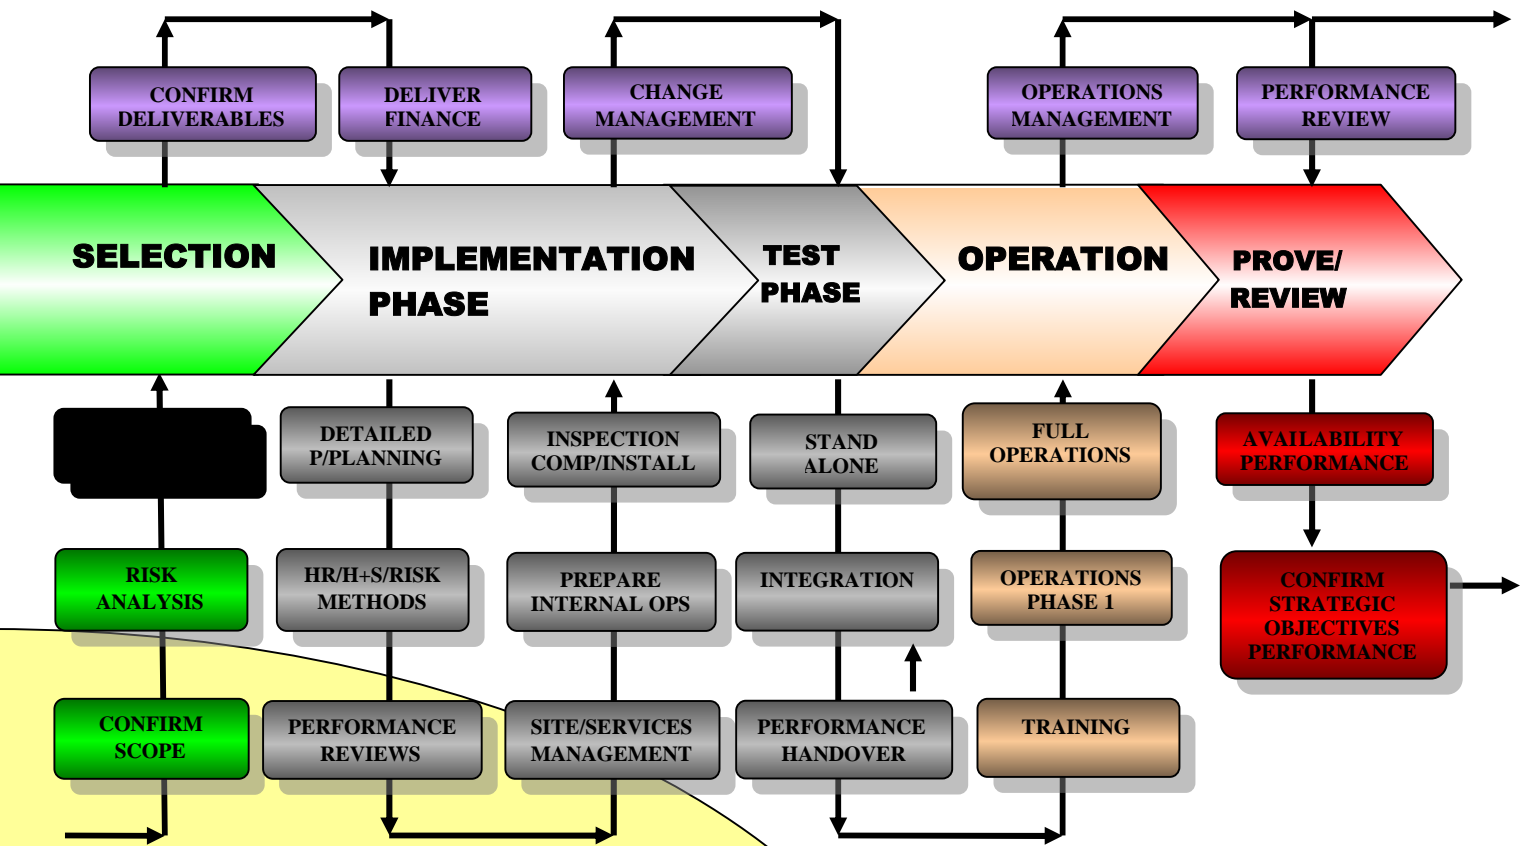

POLYGON will work with you to develop the best programme specific to your development needs, identifying the critical stages where risk and performance control will best ensure the results you are expecting.

“REALISING

..... Implementation

THE POLYGON PARTNERSHIP.....delivers, as your Development Partner the vital internal and external design verification, performance proving, implementation and systems viability monitoring of your project investment to maintain maximum performance visibility **continuously.....**

EXPECTATIONS”

- Strategic Review
- Logistics Infrastructure
- Systems Applications
- Procurement Management
- Project Management
- Simulation
- ITT and Contract
- Risk Analysis
- Test and Availability
- H+S

STRATEGIC REVIEW.

Reviews of current supply chain in relation to future development/ business integration.
Rationalisation and location strategy.
